

File Name : Patient 1 (Saturday May 2024, 09 PM).mp3 Conversation : Is this filming? Yes. Here is a doctor today. We just watched my hands going quick. Would you perform a film here? Oh, you can't. That's fine. Great. Once I see you, I see you. Can you tell me why is your day? I have a chair on the head. Oh, it looks really bad. Is there anything else besides your head aches that you want to dress here today? No. Just that except I am concerned, I just recently changed insurance companies and I'm not sure this is going to be covered yet. I was already, um, because what we can do is while we're talking and I'm doing your history in physical. I will have my office secretary and I can do the insurance planning again. So you don't have to worry about that. Sounds great. I'm not sure anything else? No, I just, this is just really bad. So what I like to do today is let's take a look at what's causing your headache. I will go over history for school and then we'll do our gun and physical exam. And then we will look into your insurance policy and make sure that's all okay. I don't think there's that sound like a good plan. Sounds good. Perfect. So tell me a little bit more about this head pain that you're having. Well, um, it started about three days ago and, um, nothing has helped. It, it's, it's just laid me flat. I, um, haven't been able to go to work. Um, it's, um, nothing's helped. I, um, it's, it's all over. Um, I, it was really bad when I moved, so I'm trying not to move too much. And the light is bothering me a lot. Um, and unfortunately, I can't dim the lights in the throat, but so okay. I'll try to go quickly and, um, it would be okay if I took some notes. All right. So you said this head started about three days ago. Okay. Um, was there any, um, anything that brought down anything unusual that happened maybe three days ago? Really? No. Okay. Um, can you tell me, um, anything that makes it better? It's really nothing's made it better. I took some Tylenol, like, okay, Moltenon, nothing, um, I just try not to move too much. All right. Um, was everything that makes it worse? Yeah. Like, movement, movement, and light. Okay. And, um, it's just constant though. There's, you know, it doesn't, it's just constant. It's, it's all over. Okay. Um, so if you had a rate, I'm in a pain scale. Um, zero being your pain, 10 being the worst pain you ever had to attend. Okay. I've never had a headache like this. Okay. Yeah. That sounds really bad. Um, now as far as radiation doesn't move, does it, you said the head, the pain is all up, but you're kind of all over. Okay. Um, but it, it also, I've got this, it's shooting pain down my neck and my neck is, is there a stiff? Okay. Um, but it's, it's, it's, it's the entire head. Okay. Um, as far as, in the, in the time that you said that, you know, it's sort of we do to go to the, the, you said, you've constant. Yeah. Yeah. Yeah. It, it, it started gradually,
