

CSC 455: Assignment 2

Select a social media platform that each of the group members can access and download their own data set of their friends.

- ☐ Combine the data set to form a larger set of data
- ☐ Ensure your data has the relationships (node-to-node i.e. edge list)
- ☐ Download and Install any of the platforms that you can use to carryout data analysis e.g.

NodeXLPro , Gephi, R, Python Graph Libraries

- ☐ Illustrate your results as a graph and the network metrics obtained. platforms
- ☐ Use the two platforms to map your network
- ☐ Document what you learn/observe from the data

Prepare a short presentation to share your results. A group member will be selected to share the findings in class on 23rd April 2024
